

ABOUT ME

An Informatics Engineering student at Universitas Maritim Raja Ali Haji with a strong interest in computer networks and wireless infrastructure. Skilled in routing & switching, wireless networking, troubleshooting, and network simulation using Cisco Packet Tracer and MikroTik. Experienced in developing network topology designs, web-based systems, and data mining projects through academic and industrial experience. A fast learner with leadership experience and strong problem-solving abilities, seeking opportunities to grow as a Network Engineer.

TECHNICAL SKILLS

-  Routing & Switching
-  Network Troubleshooting
-  Wireless Networking
-  Networking Tools :
MikroTik, Cisco Packet Tracer
-  Data & Analytics

SOFT SKILLS

-  Team Collaboration
-  Problem Solving
-  Critical Thinking
-  Adaptability

LANGUAGES

	Indonesian	Native
	English	Basic
	Arabic	Basic

EDUCATION

Universitas Maritim Raja Ali Haji | 2023-Present

Teknik Informatika

Currently pursuing a degree in Informatics Engineering with a strong interest in computer networking and wireless infrastructure. Gaining knowledge in networking, programming, and system development through academic coursework and projects.

MAN KARIMUN | 2020-2023

IPA

Completed senior high school education with a Science (IPA) specialization and served as Chairman of the Student Council (OSIS), developing leadership and communication skills.

PROJECT EXPERIENCE

Network Infrastructure Design Project

Designed and implemented a network infrastructure simulation connecting 10 districts along with multiple villages and sub-district offices using a Ring Topology architecture. Configured routing, DHCP, and wireless network systems using Cisco Packet Tracer to ensure stable and efficient inter-office communication across the network environment.

District Network Infrastructure Simulation Project

INTERNSHIP EXPERIENCE

Assistant Project Controller Intern in PT KMS

Assisted the Project Control division in managing and documenting Request for Inspection (RFI) data for barge ship construction projects. Responsible for recording inspection data from QC and PIC teams using Microsoft Excel to support project documentation and monitoring processes.
